SUMMARY

Full-stack software engineer (React, Flutter, Node.js, FastAPI, Python) with hands-on experience shipping production ERP systems, mobile apps, REST APIs, and ML pipelines across three engineering internships and two competitive job simulations (JPMorgan Chase & Co., Walmart Global Tech). Published ML researcher (JETIR, Dec 2025) and 5-star Coder on HackerRank. Strong in system design, Agile delivery, and CI/CD.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, Dart, SQL

Frontend/Mobile: React, Next.js, Flutter, HTML5, CSS3

Backend: Node.js, FastAPI, Django, REST APIs, Celery, Microservices

AI/ML: PyTorch, scikit-learn, Pandas, NumPy, LSTM/GRU, LLM Integration

Data/Cloud: PostgreSQL, MongoDB, Redis, AWS (EC2, S3, Lambda), Docker, Kubernetes

AI Dev Tools: Cursor, Claude, GitHub Copilot, Antigravity

Practices: Agile/Scrum, CI/CD, Git, System Design, Unit/Integration Testing

INTERNSHIP EXPERIENCE

Full Stack Engineer — Zetheta Algorithms Private Limited

Jun 2026 – Aug 2026

- Built LendSwift, an 8-step multi-step loan application form (React 19, React Hook Form, Zod) with encrypted auto-save, e-signature capture, and a 30+ case Cypress test suite; also designed a 12-domain SAP S/4HANA-to-analytics integration architecture with a retry/circuit-breaker/DLQ framework.
- Authored a multi-region DR architecture for payment systems (active-active/active-passive designs, DNS failover, 12 disaster runbooks) and built an event-driven notification engine with priority-aware routing and compliance checks.
- Stack: React 19, TypeScript, Node.js, Kafka, RabbitMQ, Redis, Terraform, OpenAPI, Cypress.

Machine Learning Intern — Karunadu Technologies Pvt. Ltd.

Feb 2026 – May 2026

- Built a Movie Classification and Rating Prediction system and a Job Role Prediction model using supervised machine learning techniques.
- Performed data preprocessing, feature engineering, model training, and evaluation, improving prediction accuracy through data cleaning and model optimization.
- Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook.

Software Development Intern — Visabi Technologies Pvt. Ltd.

Oct 2025 – Feb 2026

- Built the sign-in/sign-up flow of the Android app in Flutter and extended development across the app's React-based screens; the app (vERP 2.0) is live on the Play Store ([Link](#)).
- Played a key role in re-architecting the web ERP from single-tenant to multi-tenant and led a substantial revamp of the web application, improving both structure and user experience.
- Stack: Flutter, Dart, React, PostgreSQL, REST APIs, Android.

VIRTUAL EXPERIENCE PROGRAMS

JPMorgan Chase & Co. — Software Engineering Job Simulation (Forage) [\[Certificate\]](#)

Jul 2026

- Completed practical tasks in project setup, Kafka integration, H2 database integration, REST API integration, and REST API controller design.

Walmart Global Tech — Advanced Software Engineering Job Simulation (Forage) [\[Certificate\]](#)

Jul 2026

- Completed practical tasks in advanced data structures, software architecture, relational database design, and data munging.

ACADEMIC PROJECTS

FinSight — AI Personal Finance Platform

Published: JETIR2512044 | [Link](#)

- React + FastAPI dashboard with LSTM/GRU forecasting (92%/90% accuracy) and Solana/Web3.js fiat + crypto tracking; 2nd runner-up at department exhibition.

Job OS — Multi-Agent Job Acquisition Platform

[Link](#)

- 10+ agent pipeline for job aggregation, resume-to-job LLM matching, and Playwright-based ATS automation with a Next.js approval dashboard.

EDUCATION

B.E. in Computer Science — Sri Krishna Institute of Technology (VTU), Bengaluru

Aug 2022 – May 2026

GPA: 8.23 / 10.0
