Summary

Full-stack Software Development Engineer with three internships building production ERP systems, mobile apps, REST APIs, and machine learning pipelines using React, Node.js, Express.js, FastAPI, Flutter, and Python. Strong in system design, Agile delivery, and CI/CD. Published ML researcher (JETIR, 2025), 5-star HackerRank coder, and completed JPMorgan Chase & Walmart Global Tech engineering simulations.

Technical Skills

- **Tech Stacks:** JavaScript, Python, SQL, TypeScript, Java, React, Node.js, MongoDB, Express.js, REST APIs
- **Tools:** Git, VS Code, AWS, Cursor, Claude
- **Practices:** Agile/Scrum, CI/CD, Unit/Integration Testing, System Design

Internship Experience

Zetheta Algorithms Private Limited

Jul 2026 – Aug 2026

Full Stack Engineer Intern

- Built LendSwift, an 8-step loan app (React 19, Zod) with auto-save, e-signatures, and 30+ Cypress tests.
- Designed a 12-domain SAP S/4HANA integration and multi-region DR architecture for payment systems.
- **Stack:** React 19, TypeScript, Node.js, Kafka, RabbitMQ, Redis, Terraform, Cypress.

Karunadu Technologies Pvt. Ltd.

Feb 2026 – May 2026

Machine Learning Intern

- Built supervised machine learning models for movie rating prediction and job-role classification.
- Improved prediction accuracy through data cleaning, feature engineering, and model tuning.
- **Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib.

Visabi Technologies Pvt. Ltd.

Oct 2025 – Feb 2026

Software Development Intern

- Built the Flutter sign-in/sign-up flow and React screens for vERP 2.0, live on the Google Play Store.
- Re-architected the web ERP from single-tenant to multi-tenant, improving structure and user experience.
- **Stack:** Flutter, React, PostgreSQL, REST APIs.

Notable Projects

FinSight – AI Personal Finance Platform ([GitHub](#))

Published: JETIR2512044

- Built a React + FastAPI dashboard with LSTM/GRU forecasting (92%/90%); 2nd runner-up at exhibition.
- Built a Node.js/Express and MongoDB backend with JWT auth, Gemini statement parsing, and Solana tracking.

Job OS – Multi-Agent Job Acquisition Platform ([GitHub](#))

- Built a 10+ agent pipeline for job aggregation, LLM resume matching, and Playwright ATS automation.
- Implemented multi-board job sync and Gmail inbox tracking; Dockerized and deployed on AWS EC2.

Virtual Programs

JPMorgan Chase & Co. – Software Engineering Job Simulation (Forage)

Jul 2026

- Completed tasks in project setup, Kafka integration, H2 database, and REST API design ([Certificate](#)).

Walmart Global Tech – Advanced Software Engineering Job Simulation (Forage)

Jul 2026

- Completed tasks in advanced data structures, software architecture, and relational database design ([Certificate](#)).

Education

Visvesvaraya Technological University (VTU)

Aug 2022 – May 2026

B.E. in Computer Science, Bengaluru

CGPA: 8.23 / 10.0 (82.30%)
